- Honest

ABSTRACT

Mechatronics Engineer with experience as a frontend developer using React. I have knowledge in design, creation, refactoring and troubleshooting of components in a web page. Also, I can contribute to a better architecture of the project by creating unit tests to avoid future errors. On the other hand, I have knowledge as a data analyst using Python.

OBJECTIVE

Being part of a software development team using React to contribute to the design of a better structure in Functional Components obtaining better efficiency. Likewise, create unit tests for these components and ensure the desired result. Also, achieve better skills and knowledge to provide a greater contribution every day.

EXPERIENCE

Software Developer | [ZionSoft](#)

May 2022 – Present

Oaxaca, Mexico

- I collaborated as a frontend developer in two projects using React and other libraries.

Project Intern | [Technological University of the Mixteca](#) |

Feb 2021 – Aug 2021

Oaxaca, Mexico

- With a RaspberryPi card and Python, an image processing project with artificial vision was carried out.

Internship Trainee | [KATA: Solar Energy and Business Development](#)

Jun 2019 – Sep 2019

Oaxaca, Mexico

- Acquisition and enforcement of skills in Python, web development, Database, git and solar energy. Likewise, develop prototypes of solar panels in SolidWorks®

EDUCATION

Mechatronic Engineering | [Technological University of the Mixteca](#)

Oct 2015 – Jun 2021

School of Web Development and Data Science | [Platzi](#)

2021 – Present
